## POLES FIXING SYSTEMS

The Airone system provides fixing systems for each type of surface: from sand to floors, from ground to concrete.

Versatility: with the Airone system it is possible to shade gardens and outdoor spaces easily, due to the different fixing systems together with the wide range of shapes and sails dimensions.

Elegance: with the essential shapes, the choice of the pole finishing and sails, you can obtain systems which suit every kind of garden and building style.

Quality: the patented designed profile of the poles, gives a high resistance to the system; all the metal parts have been zinced and coated, in order to have an excellent protection against atmospheric agents. Otherwise, using the stainless steel version, you can have a very high resistance and a modern and nice finishing.
Convenience: the Airone system is designed to allow easy and safe assembling, even for not specialized people. Moving sails is easy, due to practical unblocking systems that can be used in complete safety.

A big step forward compared to the classic umbrella.

SAILS

The Airone system provides a wide range of fabrics for coverage up to 30 m² with different characteristics of impermeability and shading capacity.

SAIL TENSIONING SYSTEMS

The Airone system provides tensioning systems for every need with different functionalities, usage and costs.
Kit BASIC 2.8

with square or rectangular sail up to 25 m²

AIRONE
high quality shading system

Customize your own shading zone of relax, choose the poles colour, the fabric and the size of the sail.

Available finishing:

- silver RAL 9006
- white RAL 1013
- anthracite
- bronze

Assembly instructions and drawings included in the pack.

Items that compose your shading zone

1x **Sail** size and fabric finishing at your choice. Choose the fabric, colour and size.

TENSIONING SYSTEMS

BASIC LOCK

EASY LOCK

Clamp for the adjustment and inclination of the sail

Bollard for a rapid blocking/unblocking of the rope

PLUS LOCK

The tensioning is the operation that allows you to tighten the sail towards the poles for having a smooth surface of the fabric. The opposite operation (detensioning), for the disassembling of the sail, is important as it must be done quickly and easily in case of need.

BASIC LOCK TENSIONING KIT

BASIC LOCK is the easiest tensioning system because of its assembling simpleness and the low cost.

		Watch video

* unique colour for anthracite and bronze poles

FIXED WALL SYSTEMS
To fix to the wall one or more angles of the sail, the Airone system includes:
• fixed wall systems
• adjustable wall systems (p. 16) both with various possibilities of tensioning.

BASIC LOCK

EASY LOCK

PLUS LOCK

ADJUSTABLE WALL SYSTEMS

EASY LOCK

PLUS LOCK

The wall slide with up/down adjustment, allows you to adjust the sail inclination from the floor, simply acting on two ropes.

• unblocking the left rope (blue) it is possible to take out or to give tension to the sail.

• unblocking the right rope (orange) it is possible to adjust the sail inclination.

NOTE: after having fixed to the wall the stainless steel profile, join it to the anodized aluminium slide with the special screws and studs to finish the assembling.

Acting on the ropes it is possible to adjust the sail inclination.

• unblocking the left rope (blue) it is possible to take out or to give tension to the sail.

• unblocking the right rope (orange) it is possible to adjust the sail inclination.

NOTE: the colours of the ropes are for illustrative purposes only. They are supplied in black colour.

TEXTILENE FABRIC SAILS
Textilene fabric is an innovative material of synthetic origin and it is almost indestructible. In fact, the main characteristic of this fiber is the exceptional strength that ensures the most capacity against tearing and usage.

In addition, the success of Textilene is due to its resistance to temperature fluctuations, UV rays, salt, chlorine, finding a good application at seasides, seaports and boats.

TENTMESH FABRIC SAILS
Type: high density polyethylene (HDPE) mesh stabilized UV rays.

Features: Tentmesh HDPE fabric doesn't absorb water and doesn't waste away; treated in order to facilitate the processing and minimize shrinkage over time, it doesn't decay and is guaranteed against damage from UV rays. Designed in Australia to deal with torrid climate, Tentmesh can block the harmful UV rays up to 97 percent, according to Australian standards.

Uses: Tentmesh is a high quality woven shading fabric , designed expressly for tents, awnings and shading sails, especially for applications in commercial buildings.

Available colours:

Ivory - TA

Sand - TS

**On request:**

Yellow - TG

Red - TR

Cayenne - TC

Ochre red - TO

Rivergum green - TF

Brunswick green - TV

Aquatic blue - TU

Navy blue- TY

Steel grey - TH
Metal - TE

Black - TN

On request and after approval, we can realize customized sizes.
NOTE: for colours on request, please ask for availability.

HDPE FABRIC SAILS

U.V. FILTER treatment
Temperature
- 5 | +40

It is a high density polyethylene HDPE stabilized UV rays mesh.

It is the lightest and more economical mesh in our list; in any case its specifications are of a good standard. Up to 70% shading, elasticity of fabric and high mechanical resistance.

FITTINGS AND SPARE PARTS

STAINLESS STEEL SNAP HOOK

Code	Description	Price
9180IN0050	Bright stainless steel snap hook	

TENSOR

Code	Description	Price
9160AA0080	Tensor	

HIGH RESISTANCE ROPE

Code	Description	Price
9162AA0000	High resistance rope by meter	

STOPPING ROPE BALL

Code	Description	Price
9163PN0033	Stopping rope ball	

FAST OPENING SNAP HOOK

Code	Description	Price
9185IN0000	stainless steel, fast opening snap hook, to use between clamp and sail	

SHACKLE

Code	Description	Price
9181IN0000	Stainless steel shackle 6mm diameter	

TWISTED SHACKLE

Code	Description	Price
9187IN0000	Stainless steel twisted shackle	

ROPE WITH SNAP HOOK AND BASIC LOCK TENSOR

Code	Description	Price
9160AA0000	1,8m lenght rope with tensor and snap hook	

COMPLETE CLAMP

Code	Colour	Description	Price
9050NS0080 | silver RAL9006			
9050NB0080 | white RAL1013		Nylon complete clamp	
9050NA0080 | anthracite*			

* unique colour for anthracite and bronze poles

CLAMP WITH STAINLESS STEEL LEVER

Code		Colour	Description	Price
9052NS0080	silver RAL9006			
9052NB0080	white RAL1013		Clamp with stainless steel lever	
9052NA0080	anthracite*			

* unique colour for anthracite and bronze poles

BOLLARD FOR PROFILE/POLE

Code		Colour	Description	Price
9054NS0000	silver RAL9006			
9054NB0000	white RAL1013		Bollard for profile/pole	
9054NA0000	anthracite*			

* unique colour for anthracite and bronze poles

U-BOLT FOR WALL

Code	Descrizione	Price
952IN0000	U-bolt for wall	

U-BOLT

Code	Description	Price
950IN08_04	Round rod U-bolt Ø 9mm, bright stainless steel Dimension 80x50 mm	

COMPOSITE PULLEY

Code	Description	Price
9188IN0000	Composite pulley	

PULLEY WITH ROPE LOCK

Code	Description	Price
9189IN0000	Composite pulley with rope lock	

STAINLESS STEEL PULLEY

Code	Description	Price
9182IN0000	Stainless steel pulley (U-bolt and shackle not included)	

FORCE REDUCTION 3:1 SYSTEM

Code	Description	Price
9184IN0003	**Plus Lock** system with stainless steel clamps (rope not included)	

WALL CAMCLEAT

Code	Description	Price
9186IN0000	Camcleat for wall systems	

BOLLARD

Code	Description	Price
9183IN0000	Stainless steel bollard	

POLYPROPYLENE CAP

Code	Colour	Description	Price
9200PS0000 | silver RAL9006			
9200PB0000 | white RAL1013		Polypropylene cap	
9200PA0000 | anthracite*			

* unique colour for anthracite and bronze poles

75° SPACER
Code	Colour	Description	Price
9220PS0000 | silver RAL9006		75° lower spacer made of nylon	
9220PA0000 | anthracite*			

* unique colour for anthracite and bronze poles

80° SPACER
Code	Colour	Description	Price
9230PS0000 | silver RAL9006		80° lower spacer made of nylon	
9230PA0000 | anthracite*			

* unique colour for anthracite and bronze poles

90° SPACER

Code	Colour	Description	Price
9210PS0000 | silver RAL9006		90° lower spacer made of nylon	
9210PA0000 | anthracite*			

* unique colour for anthracite and bronze poles

HEXAGONAL KEY

Code	Description	Price
9230AZ0000	Hexagonal key by zinced steel for clamp nut adjustment.	

COUNTERBALANCE

Code	Description	Price
9142VA0000	Counterbalance for 2,80 m poles and supports cod.9076 o 9088 with screws. Weight to load Kg. 225. Dimension 1150 x 400 mm	

TECHNICAL INFORMATION

MT 2.80 POLE

For the floor fixing of the poles it is possible to use:
• high performance chemical fixing with minimum M12 threaded bar (minimum 1100 kg traction load for each hole)
• Heavy security fixing (steel dowels) minimum M12 (minimum 1100 kg traction load for each hole)
The dimensions of the eventual plinth for the poles code 9000 lenght 280 cm is: cm 80x80x 45 cm depth.
For further informations please consult or request the item technical sheets.

MT 3.20 POLE

For the floor fixing of the poles it is possible to use:
• High performance chemical fixing with minimum M12 threaded bar (minimum 1300 kg traction load for each hole)
• Heavy security fixing (steel dowels) minimum M12 (minimum 1300 kg traction load for each hole)
For further informations please consult or request the item technical sheets.
The dimensions of the eventual plinth for the poles code 9000 lenght 320 cm is: cm 100X100X40 cm depth.
Note: the 75° floor supports code 9076 and 90° floor supports code 9088 cannot be used with poles by high resistance code 9000 lenght 320 cm.
Other codes that cannot be used with pole by high resistance code 9000 lenght 320 cm are:
code 9170 counterplate, code 9175 double plate, code 9121 and code9116 supports for double plate, code 9115 and code 9120 ground support, code 9142 counterbalance.

PARAPET FIXING SYSTEMS

The stirrups code 9105 allow to outdistance the pole at 90° from the wall (or other surface) from 70 mm to 95 mm.
It is also possible to incline the profile of 2° to correct any surface imperfection.
The counterplate code 9107 allows the fixing to existing structures acting as a clamp.
The turning stirrups cover an angle of 140°, and always to be aligned to the sails diagonals or bisectors.
Note: the upper stirrup must be positioned at a distance of not less than 60 cm from the ground.

SUNWORKER FABRIC SAILS   Only on request and after approval

Sunworker fabric is a modern product, it makes a high performance thermal barrier.
The main feature is seeing without being seen, it protects the intimacy while providing a complete outward visibility. The micro aerated structure creates an authentic thermal filter and blocks up to 92% of the heat produced from solar radiation.
The fabric is made of high-tenacity polyester.
The special weaving method ensures an incomparable structural strength.
Thanks to special coating with mass dyeing, the colors remain unaltered in time.
Sunworker fabric is suitable for any application, including bars, restaurants and hotels.
